### **DETAILED ACTION**

1. This is the First Office action on the Merits from the examiner in charge of this application.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6-8, and 19-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 6 and 19, "the top and bottom decks" lacks antecedent basis, thus indefinite. Claims 7 and 20, "the top member and mid-top member" lacks antecedent basis, thus indefinite. Claims 8 and 21, "the bottom member and mid-bottom member" lacks antecedent basis, thus indefinite.

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 3637

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
6. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/01588 to Apps in view of US 2001/0031807 to Adedeji et al.

Apps discloses a pallet assembly comprising all the elements recited in the above listed claims including, such as shown in Fig 5, a first deck member, a second deck member mounted to the first deck member, a third deck member spaced from the second deck member, a fourth deck member mounted to the third deck member, at least one column member extending between the second and third deck members, at least one elongated reinforcement member extending within at least one of the top and bottom deck members, such as shown in Fig 30. The differences being that Apps does not disclose each of the deck members having a predetermined fire retardancy, some being the same or less than other.

Adedeji et al teaches the idea of providing a plastic pallet with fire retardant material in order to prevent major damage to the pallet when fire occurs. Therefore, it would have been obvious to modify the structure of Apps by providing the deck members with fire retardant material in order to prevent major damage to the pallet when fire occurs, as taught by Adedeji, since both teach alternate convention plastic pallet structure, used for the same intended purpose, thereby providing structure as claimed. In regard to each deck member having a predetermined fire retardancy, some being the same or less than other, it would have been obvious and well within the level of one skill in the art to provide the pallet of Apps, as modified by Adedeji, with each deck member having a predetermined fire retardancy, some being the same or less than other, since applicant has not disclosed the criticality of having each deck member with a

Art Unit: 3637

predetermined fire retardancy as claimed, and it appears that the pallet of Apps, as modified, would perform equally as well.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weiland et al, Evans, Ruma, Kinzie, and Nagano et al all show structures similar to various elements of applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh V. Tran whose telephone number is (703) 308-6302. The examiner can normally be reached on Monday-Thursday, and alternate Friday.
